

SUMMARY

With over 3.5 years of professional experience as a Frontend Engineer, I have demonstrated expertise in Angular, Reactjs, and multiple programming languages. My collaborative work ethic shines in both team settings and independent projects, reflecting a solid grasp of object-oriented analysis. I am dedicated to enhancing existing systems and technologies by implementing common programming design patterns and best practices. With excellent communication skills and a keen eye for detail, I efficiently tackle complex tasks. Equipped with analytical prowess and strong problem-solving abilities, I consistently deliver high-quality solutions autonomously.

PROFILE SUMMARY

- 3.5+ years experience as a Frontend Engineer.
- Having good exposure in Angular, Reactjs as well as other languages.
- Worked with the team as well as individually.
- Good knowledge and understanding of object-oriented analysis.
- Always looking for the betterment of existing systems and technologies.
- Familiarity with common programming design patterns and best practices
- Excellent written and verbal communication skills
- Strong attention to detail and problem-solving.
- Analytical mind with problem-solving aptitude
- Ability to work independently

EDUCATION

Chandigarh group of colleges

Bachelor's Degree in Electronic and Communication
August 2017 – June 2021

Thakur Kanshi Ram Memorial School

Non-Medical (HPBOSE)
April 2016 – March 2017

SKILLS

- Javascript, Typescript, React.js, Angular, HTML, CSS, Bootstrap, Angular Material, MaterialUI, Azure Functions
- Node.js, Express, REST APIs
- MongoDB, NOSQL
- GIT, Docker
- Windows, MacOS
- Data Structures, Micro-services

PROFESSIONAL EXPERIENCE

MEAN/MERN Developer

IMansa Infotech Pvt | Aug2021 – 2024 Present

- Understand the architecture of existing products, development of new modules depending on the client requirements.
- Understand the performance-related issue and maintain consistency as a requirement
- Familiarity with database technology such as NOSQL
- Managing the complete software development process from conception to deployment
- Developing front end website architecture.
- Identify, prioritize and execute tasks in the software development life cycle
- Develop tools and applications by producing clean, efficient code
- Automate tasks through appropriate tools and scripting
- Review and debug code
- Perform validation and verification testing

MERN Developer

Pando Indian Software Consultant. | Aug 2020– July 2021

- Maintaining and upgrading the software following deployment
- Managing the end-to-end life cycle for the production of software and applications
- Overseeing and guiding the analyzing, writing, building, and deployment of software
- Modifying and testing changes to previously developed programs
- Collaborate with internal teams and vendors to fix and improve products
- Document development phases and monitor systems
- Designing user interactions on web pages.
- Investigates problem areas.
- Azure Functions used as Serverless architecture to deploy API
